

2026

Corporate Profile

Since 2007, Script Solutions has delivered flexible, world-class cloud infrastructure to ministries, banks, telecoms, and enterprises across Bahrain and global markets.

**We believe
that great
experiences
build great
businesses.**

About Script Solutions

**Built on
Experience.
Focused on Your
Business.**

Script Solutions is a Bahraini technology company established in 2007, providing cloud services, business software, and digital solutions to organizations across government, banking, telecommunications, real estate, trading, and other business sectors.

◆ Our Mission

To enable businesses in Bahrain to optimize their operations through effective IT solutions that save time, reduce effort, and support profitable growth.

◆ Our Vision

To be recognized for quality and value in Bahrain's IT industry, supported by innovation and a forward-looking entrepreneurial culture.

Our portfolio brings together FlairSuite ERP, Lena Salon Management Software, custom software development, web and mobile applications, technology consultancy, payment gateway integrations, and IT talent outsourcing.

We focus on understanding how our clients operate and developing solutions around their requirements - from connecting business functions and automating workflows to delivering customer-facing platforms and integrated online services.

Director's Message

A Commitment to Your Success

Technology investment should create business value - not unnecessary complexity.

At Script Solutions, we are committed to understanding our clients' needs and delivering technology solutions that support their operations and ambitions.

We recognize that every organization has different priorities, which is why flexibility, quality, and a practical understanding of the business remain central to our approach.

Our team is committed to building lasting client relationships and contributing to the success of the organizations we serve, alongside the continued development of the Kingdom of Bahrain.

Why Work with Script Solutions?

Established experience

Technology delivery experience dating back to 2007.

Products and customized development

A portfolio combining business software products with tailored applications and platforms.

Integration experience

Experience connecting digital platforms with government, education, and business systems.

Business-specific implementation

Solutions adapted to the operational needs of different organizations.

Connected customer platforms

Experience bringing mobile applications, customer portals, and administration tools together.

Our Solutions and Services

Our services combine ready-to-use business platforms with customized development and technical expertise, allowing organizations to address both immediate operational requirements and wider digital transformation objectives.

IT Talent Outsourcing

Script Solutions provides dedicated IT talent to support your operational goals with capable, self-disciplined professionals matched specifically to your needs.

Technology Consultancy

We provide tech guidance to help organizations select the right solutions for growth, efficiency, and digital transformation.

Custom Software Development

We build custom software tailored to your workflows, filling the gaps standard software can't to boost operational efficiency.

Mobile Application Development

We deliver end-to-end mobile apps—including redeveloped, rebranded, and bilingual solutions—supported by customer portals and centralized admin tools.

Payment Gateway Integration

We integrate payment gateways into digital platforms to support online payments and provide customers with a connected check-out experience.

Website and Web Platform Development

We build custom websites and online systems—from customer-facing platforms to integrated service portals—tailored to your exact business operations.

Cloud-Based Business Solutions

Our cloud-based solutions include Flair-Suite ERP, which brings business functions together through an integrated platform and management dashboard.

System Integration and Workflow Solutions

We build custom websites and online systems—from customer portals to integrated platforms—tailored to your business operations.

Bulk SMS Solutions

We deliver custom bulk SMS solutions, like our Al Baraka Bank project featuring background services and interactive dashboards to track messaging in real time.

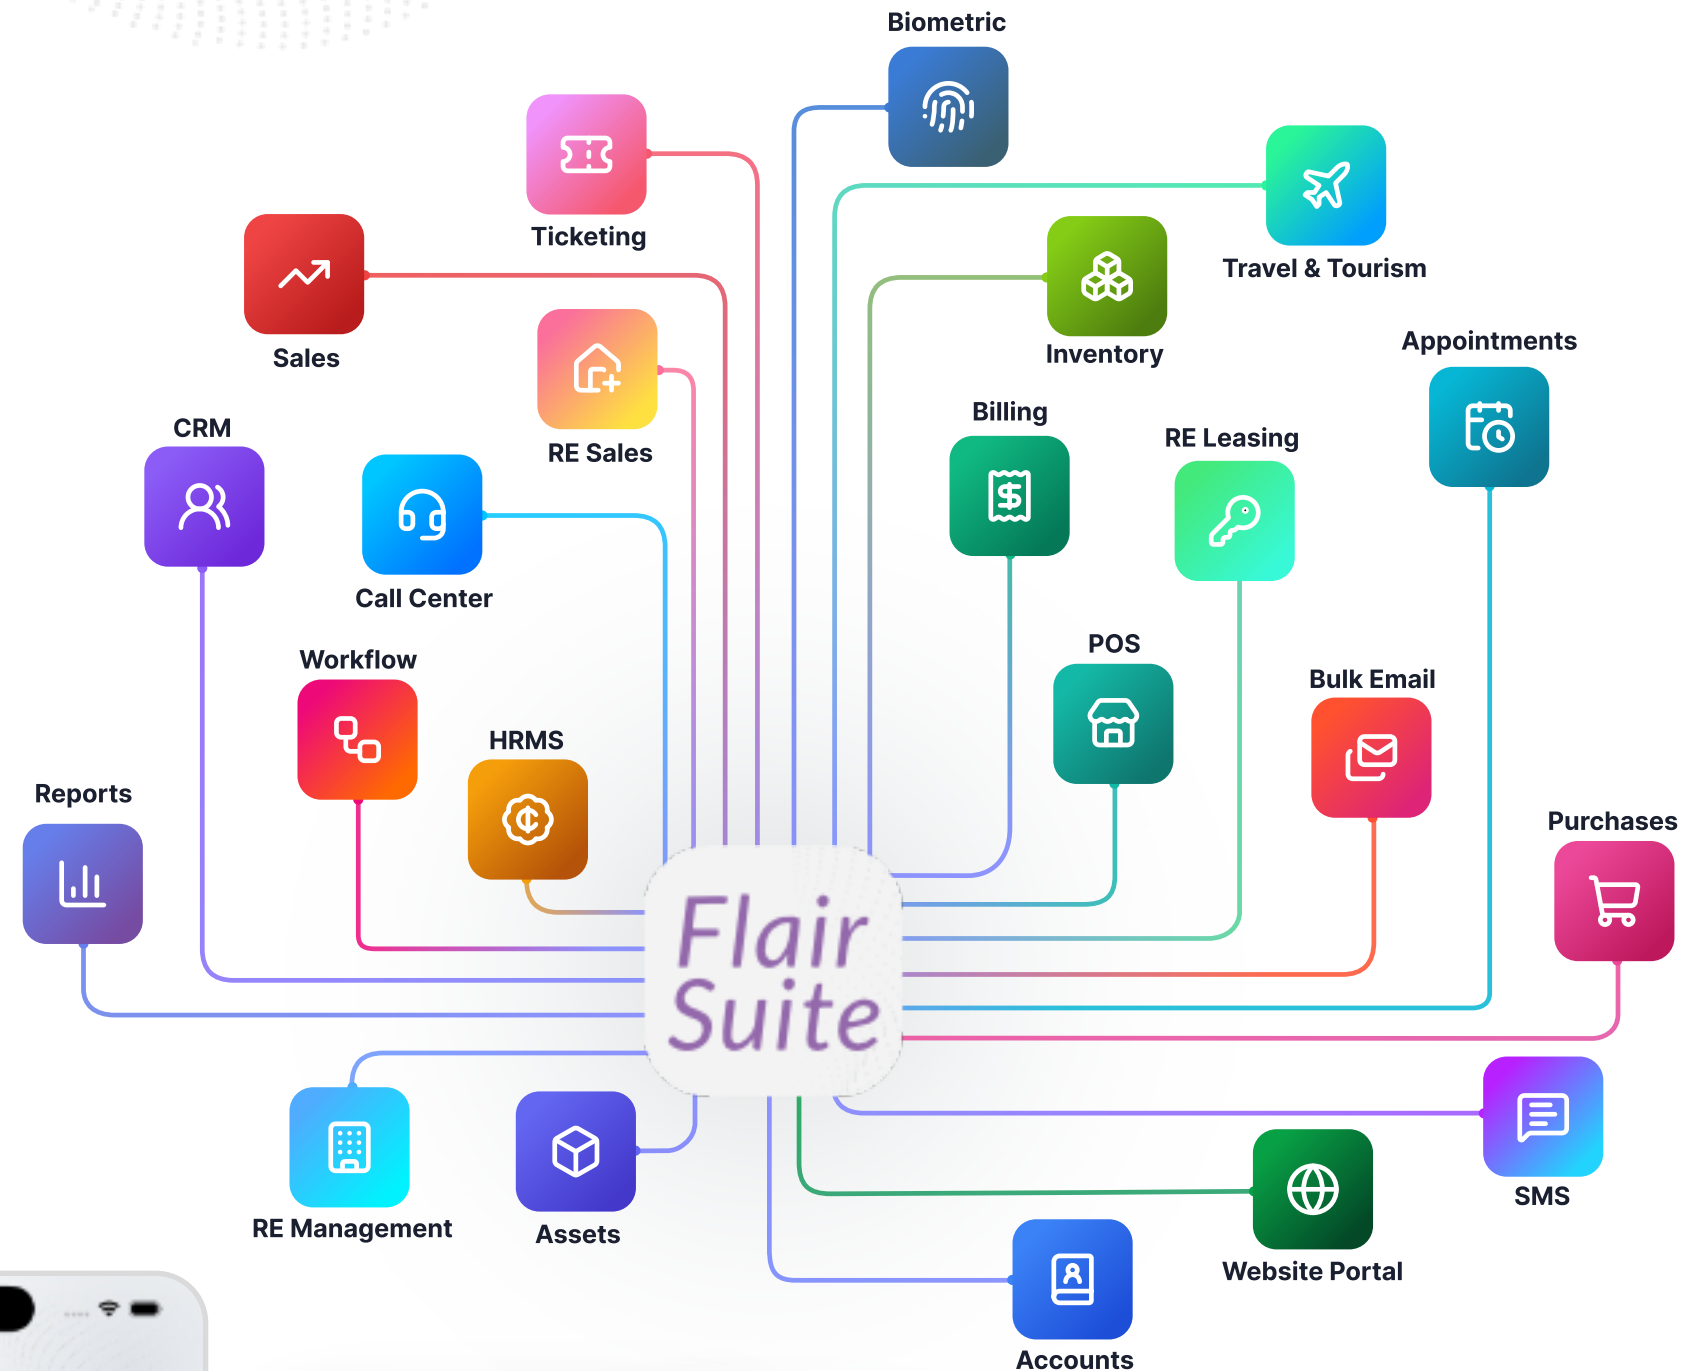

FlairSuite

All-in-One Business Suite

FlairSuite ERP brings core business functions together within an integrated management platform. The product is described in the supplied profile as an ERP solution for small and medium-sized businesses, with modules covering finance, customer relationships, inventory, purchasing, sales, projects, manufacturing, human resources, and other operational needs.

Its cloud-based offering also includes automated billing, sales and lead management, cloud point of sale, and a management dashboard.

Ministry of Industry and Commerce

Lena Salon Management Software

Manage Appointments, Customers, Staff, and Daily Operations

Lena brings salon appointments, customer information, staff organization, and service management into one platform. It is designed to simplify daily administration, support personalized service, and improve the flow of salon operations.

Features

- Appointment management**
Manage scheduling, bookings, and rescheduling through a clear operational overview.
- Customer management**
Maintain client profiles, service histories, and preferences.
- Staff organization**
Manage schedules, track performance, and administer commissions.
- Service and product catalogue**
Organize services and products, manage pricing, and track inventory.
- Operational efficiency**
Automate routine activities and reduce dependence on manual administration.
- Customer experience**
Support consistent service and more personalized customer interactions.
- AI chatbot**
Handle customer inquiries and appointment-booking interactions through an automated assistant.

Industry Experience and Client Portfolio

Our portfolio includes work across government, banking, telecommunications, real estate, education, and other commercial sectors, with solutions ranging from internal business systems to public-facing digital services.

Government and public sector

Banking and financial services

Real estate and property-related organizations

Other organizations

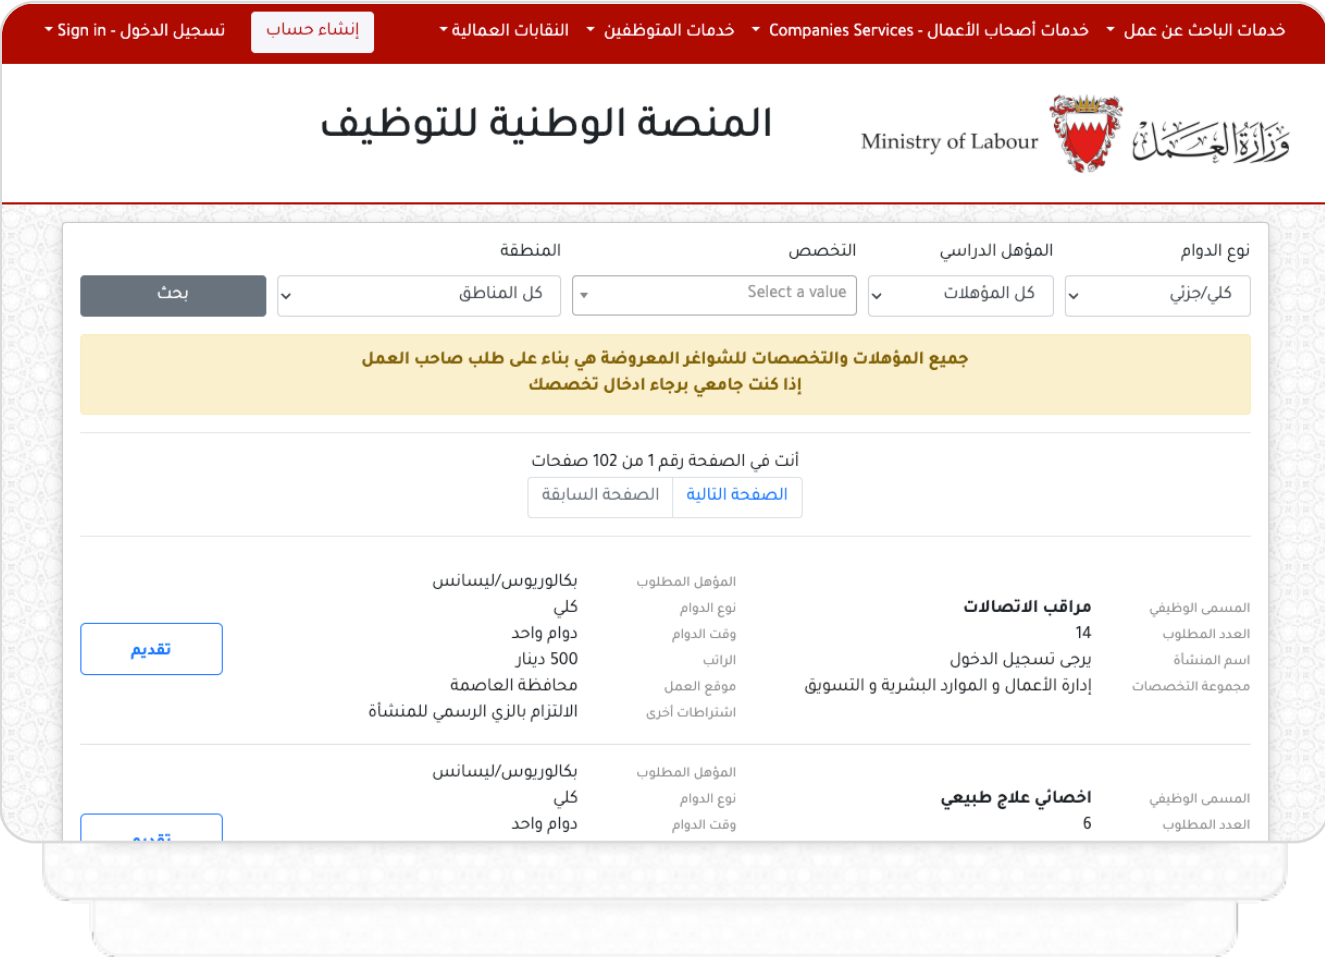

Selected Projects and Case Studies

MLSD Online Services

Connecting Employment Services and Government Workflows
Script Solutions developed the MLSD jobs portal with more than 50 online services for citizens and workflows for internal users and administrators. Built on the Flair Foundation framework, the platform supports the management of job-related processes through a connected digital environment.

Integrations

- EKey Login
- Government Notifications Service
- Social Insurance
- LMRA
- Tamkeen

eCommerce Seal - eFada

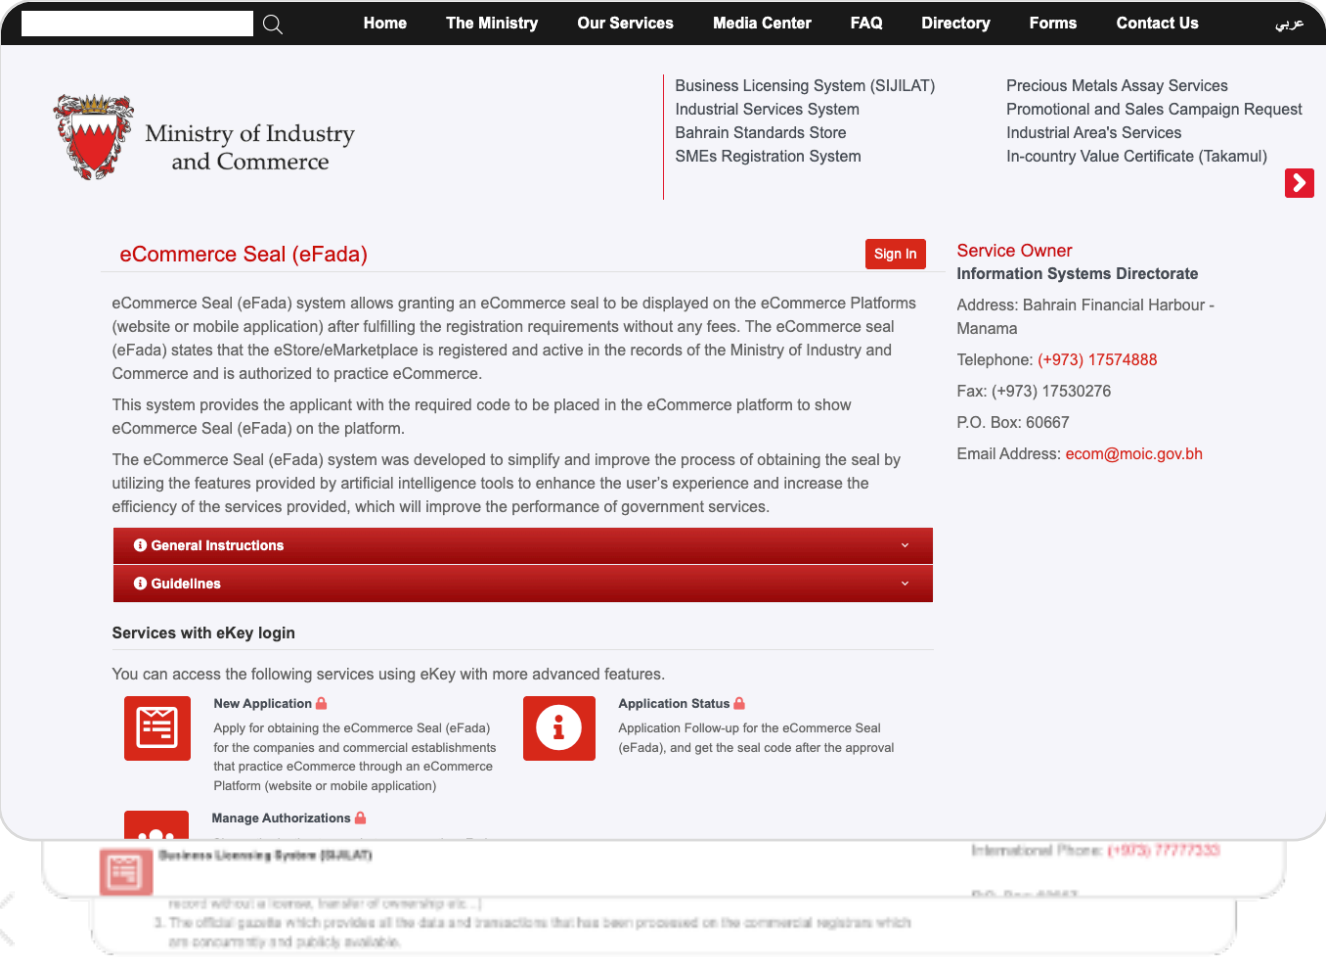

Digital Services for eCommerce Registration and Verification
Script Solutions' eFada project supports the process for granting an eCommerce seal to eligible websites and mobile applications. The supplied profile describes the seal as confirming that the eStore or eMarketplace is registered and authorized to conduct eCommerce through the Ministry of Industry and Commerce.

Functions

- New Seal Applications
- Application Status and Ownership Verification
- Authorization Management
- eCommerce Platform Verification
- Reporting Misuse

Integrations

- EKey Login
- Sijilat

EduNet Portal

A Connected Learning Management Platform

EduNet is a learning management system developed for the Ministry of Education, serving teachers, students, parents, curriculum specialists, school administrators, and operational administrators through a unified education platform.

Features

Teaching and assessment

Lesson creation, multimedia content, quizzes, tests, assignments, and discussion forums.

Communication

Messaging and communication between teachers, students, and parents.

Academic Administration

Grade management, curriculum management, and circular distribution.

Requests and Oversight

Grievance submission and tracking, reporting, and analytics.

Integrations

Curriculum Systems

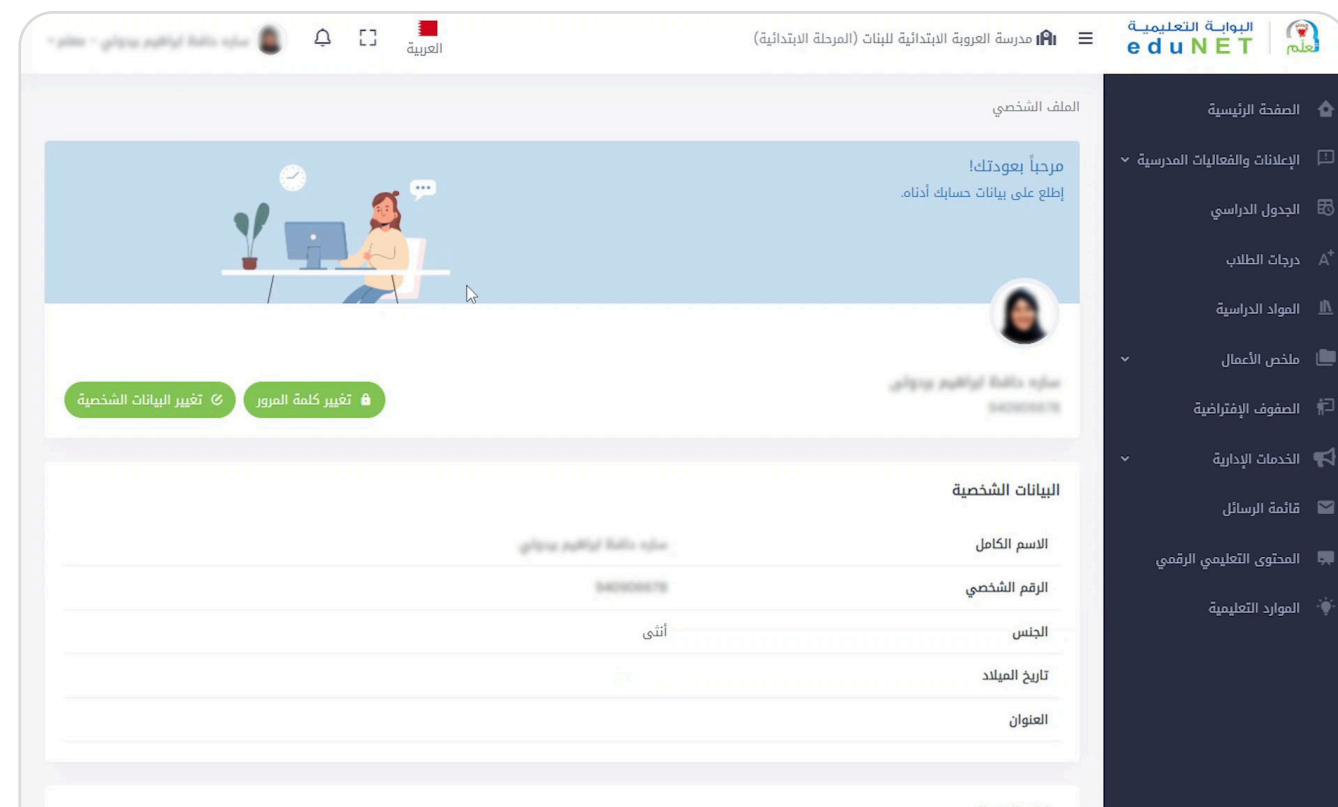

Grading Systems

Office 365

Azure SSO

Oracle Student Management Systems

AWS Storage and Email Services

Al Baraka Bank - Bulk SMS Solution

Centralized SMS Operations and Service Monitoring

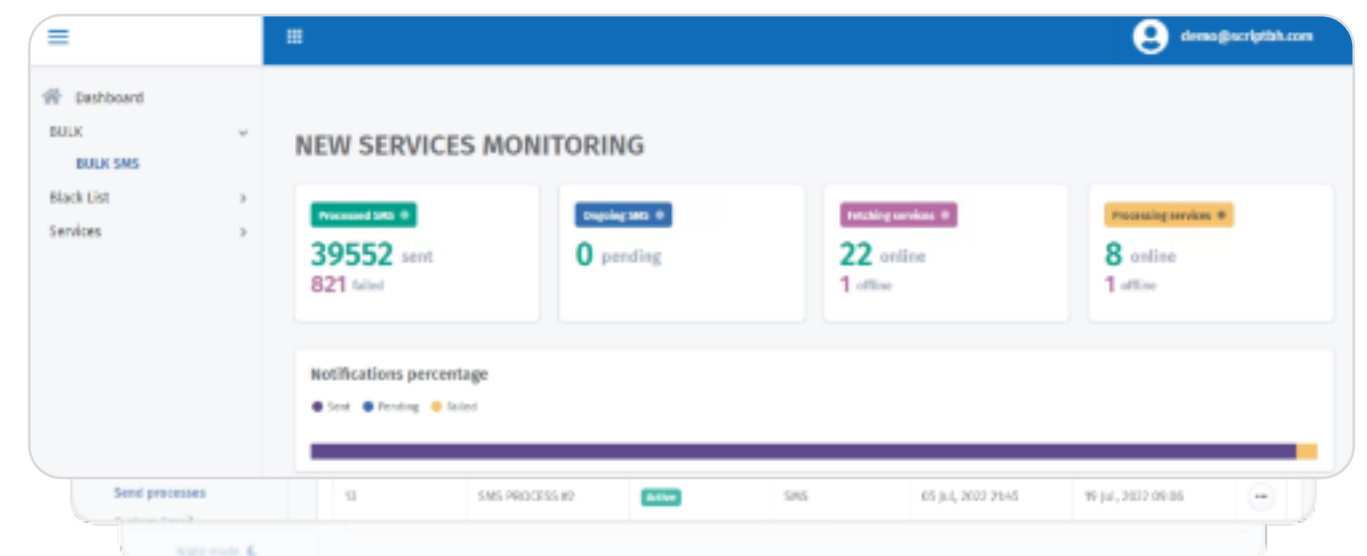

Script Solutions developed an SMS solution for Al Baraka Bank with an interactive dashboard for monitoring message-sending activity and related background processes. The solution provides administrators with visibility into sending and fetching services.

Technical details

the source describes a Node.js-based sending process and displays PHP, Node.js, MySQL, Oracle, Microsoft SQL Server, and Linux logos

We are using various latest technologies to ensure the smooth and fast sending of the SMS, The back-end sending process used nodejs with multi threading to ensure the fastest operation. We reached 40K messages within 20 minutes and the system able to exceed that limit and it's all depending on the SMPP gateway provided by the clients.

ASRK Properties / Zayani Properties

From Spreadsheet-Based Processes to Centralized ERP

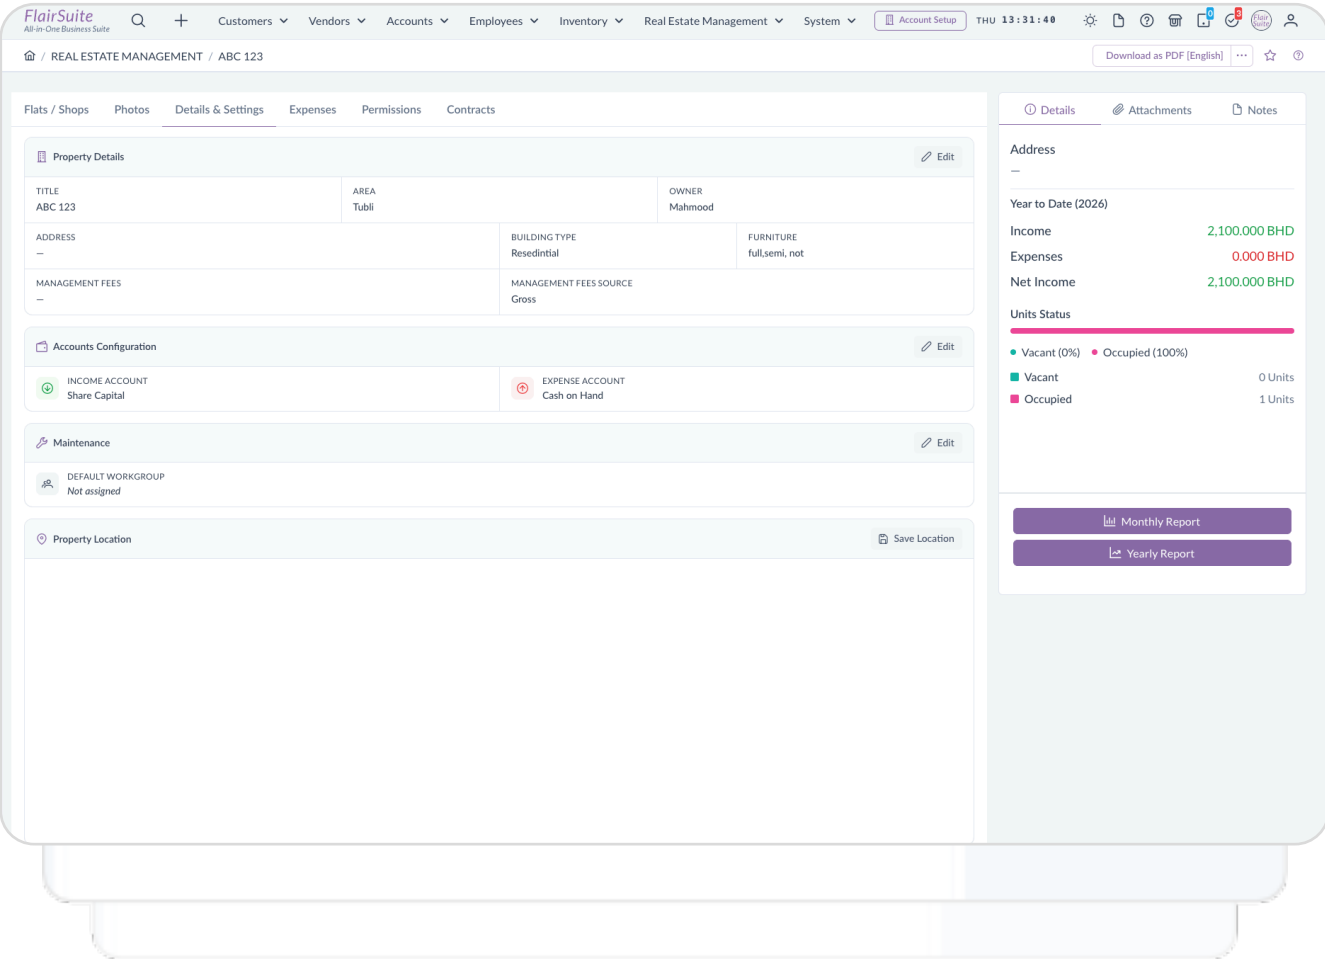

The supplied profile describes ASRK Properties, part of Zayani Properties, as moving from manual Excel-based processes to an integrated FlairSuite ERP platform. The implementation brought multiple properties into a centralized system and connected financial and property management activities.

Delivered capabilities

- Property Consolidation
- Financial and Property Process Automation
- Comprehensive Reporting
- Real-time Financial Visibility
- Digital Invoicing

Reported results

- Improved Efficiency
- Transparency
- Financial Control

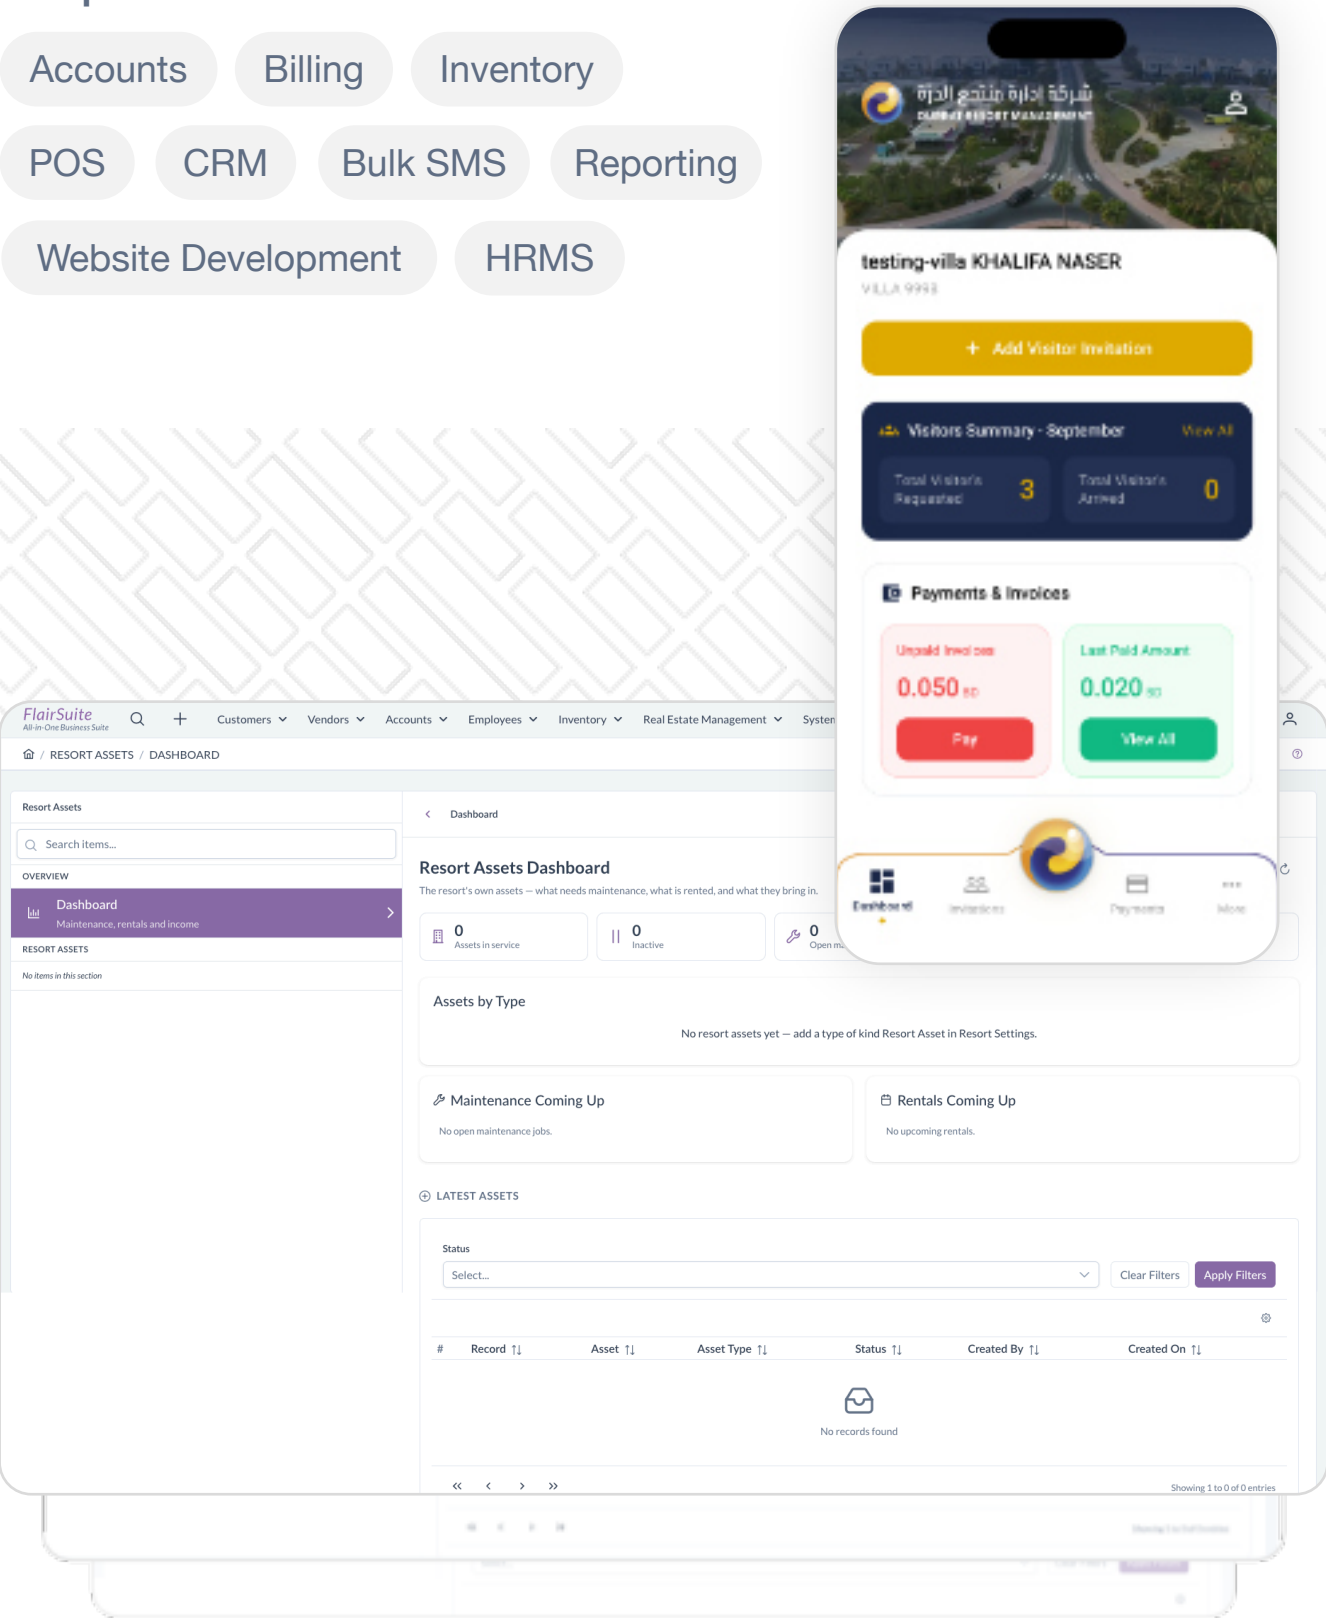

Durrat Resort Management

Integrated ERP and Digital Services

Script Solutions implemented a tailored ERP solution for Durrat Resort Management, bringing together operational modules and customer-facing digital capabilities.

Scope

- Accounts
- Billing
- Inventory
- POS
- CRM
- Bulk SMS
- Reporting
- Website Development
- HRMS

Best Location Property

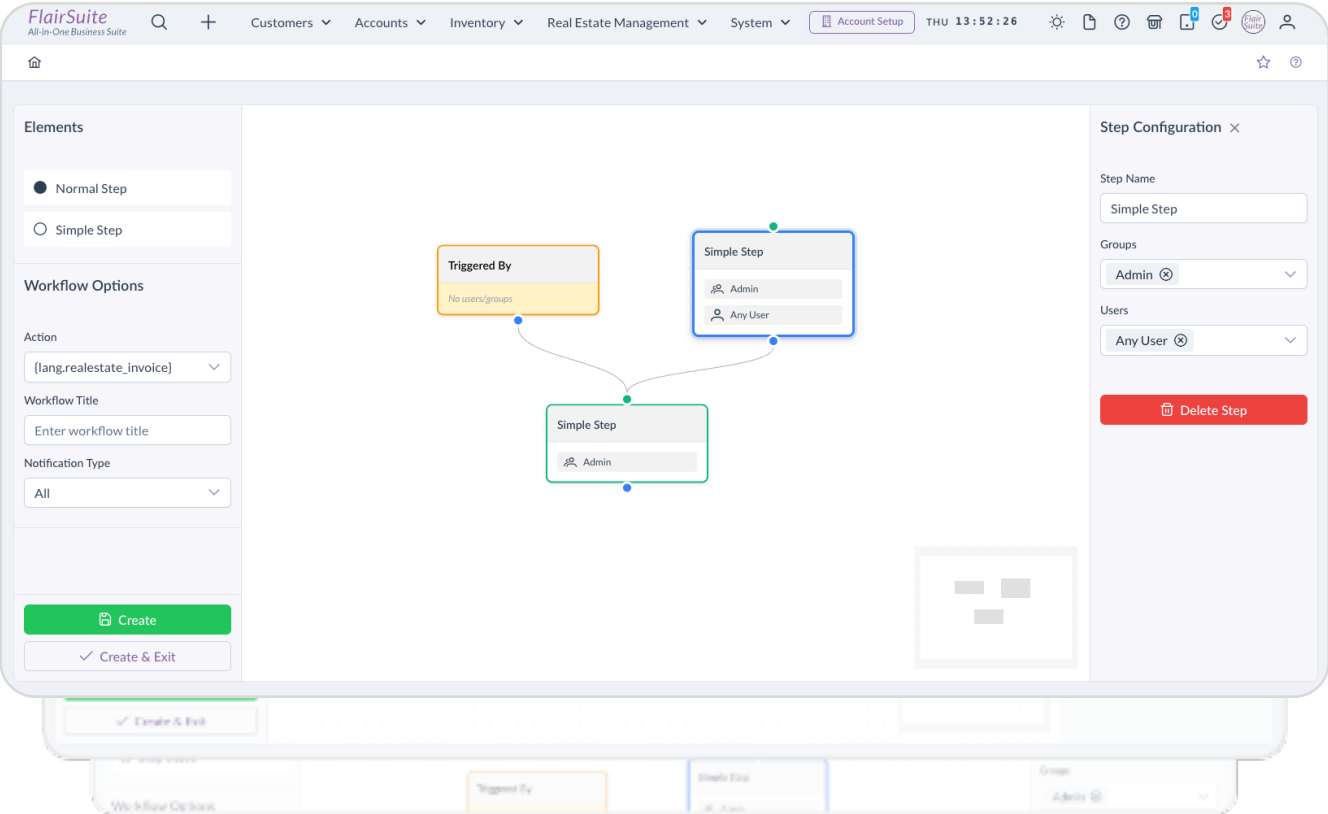

Customized Real Estate Workflows and Website Improvements Script Solutions enhanced Best Location's digital platform through FlairSuite customization and website improvements, adapting the solution to its operational requirements and key business teams.

Deliverables

- Improved Property Listings and Website Experience
- Role-based Access
- Invoices and Commission Tracking
- Branch-Specific Permissions
- Dashboards and Analytics
- Sales, Valuation, and Management Workflows

Reported benefits

- Stronger Usability
- Efficiency
- Data Accuracy
- Productivity

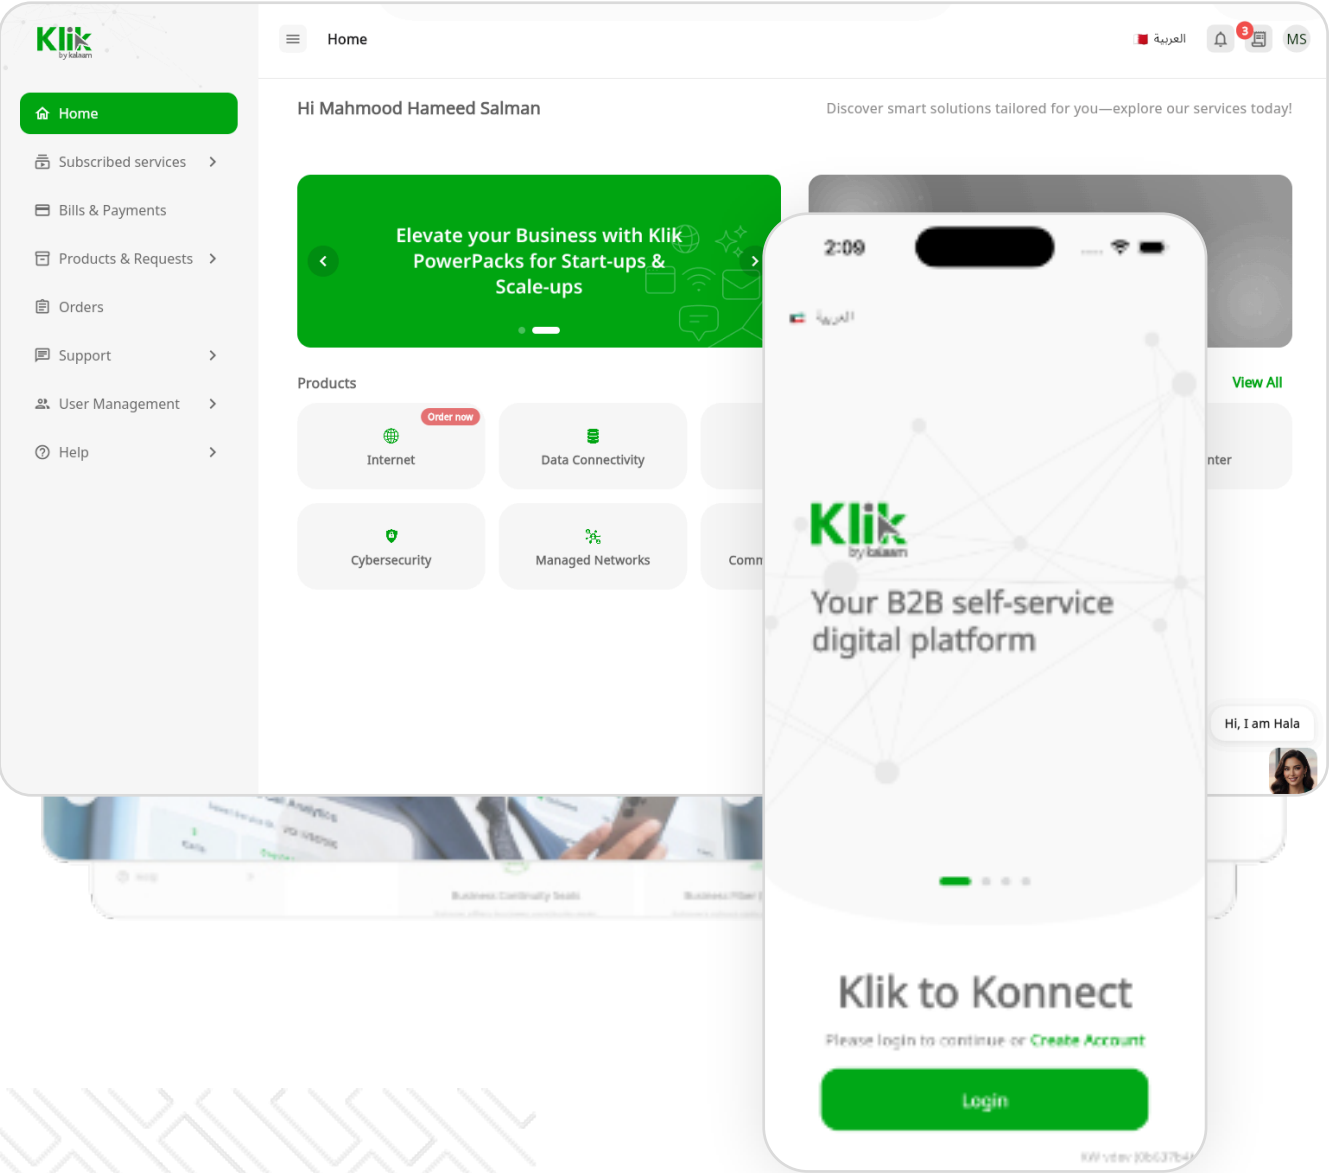

Kalaam Telecom

Connected Mobile Applications, Customer Portal, and Administration Script Solutions redeveloped and rebranded Kalaam Telecom's digital platforms, combining bilingual mobile applications, a customer e-portal, and centralized administration capabilities.

Scope

- Bilingual Application Redevelopment
- Customer Self-Service Portal
- Administration Dashboard
- Role-Based Controls
- Security Improvements
- Documentation
- One year of post-deployment support
